Education

Sardar Patel Institute of Technology (S.P.I.T.) Mumbai, India
Bachelor of Technology (CGPA: 8.95/10.0) *June 2024 – May 2028*

- Relevant Coursework: Operating Systems, Database Management Systems, Object Oriented Programming, Data Structures and Algorithms, and Computer Networks.
- **Certifications:** Developing Back-End Apps with Node.js and Express (IBM), Intro to Cloud Computing (IBM)

Technical Skills

Languages: C++, Java, Python, SQL, JavaScript (ES6+).
Backend & Web: Node.js, Express, React, FastAPI, Flask, REST APIs, WebSockets.
Databases & Infrastructure: MongoDB, PostgreSQL, Redis, Docker, Git, Postman, Vercel, Render.
AI/ML: Scikit-learn, LLM APIs, Speech-to-Text, Generative AI.

Projects

Scout | *React, Node.js, Express, Redis, BullMQ, MongoDB, Socket.IO, Python* March 2026

- Engineered a full-stack workflow automation platform with a **Node.js/Express backend**, visual workflow builder, and asynchronous execution using **BullMQ + Redis**.
- Built workflow orchestration integrating **MongoDB persistence**, **Socket.IO** real-time updates, lead scoring, send-time prediction, LLM-assisted outreach generation, and email reply tracking.
- Integrated **JWT/Google OAuth**, a Chrome extension for lead capture, Telegram notifications, and Filecoin-backed execution logs for verifiable workflow history.

Lattice | *React, Node.js, Express, Redis, WebSockets, MongoDB* April 2026

- Engineered backend services for a **real-time collaborative workspace**, using **Node.js, WebSockets, and Redis** to synchronize concurrent document updates.
- Implemented **Redis-backed Socket.IO scaling** with the Redis adapter and shared session state to support low-latency communication across connected clients.

RecoverAI | *Python, FastAPI, Scikit-learn, SQLite, LLMs* September 2026

- Engineered an **autonomous payment-recovery decision engine** that evaluates retry, payment-link, reminder, escalation, and no-action strategies using action-specific predictive models.
- Built **Logistic Regression and Gradient Boosting** models with customer-level train/validation/test separation; benchmarked the champion policy at **8.93% higher net recovery** than the rule-based baseline.
- Designed a deterministic decision layer with **cost-aware optimization, safety guardrails, idempotent recovery operations, and auditable state transitions** for every decision and action.

Experience

Team Lead & Backend Developer Aug 2025 – Present
Team NODEtorious (Multiple National-Level Hackathons) *Mumbai, India*

- Led a cross-functional team of 4 across national and international hackathons, owning backend architecture, deployment, and technical coordination while delivering deployable prototypes under 24–48 hour deadlines

Open Source Contributor & Mentor Winter 2025
Elite Coders Winter of Code (ECWoC '25) *Remote*

- Contributed to community-driven software through backend optimization, bug fixes, and codebase-level debugging across open-source projects.

Achievements

- **Hackathon Standout**: Domain Winner in Web Development at SE Hack '26, 1st Runner-Up at Coherence '26, 2nd Place at Hack-o-Infinity 2025, and Grand Finalist (Top 6 HealthTech) at LaserHacks USA 2025.
- **Competitive Programming**: Achieved **Pupil** rank on Codeforces within 5 contests (Current Rating: 1240); solved 200+ problems across Codeforces, LeetCode, and CodeChef.
- **Research Publication**: First author of the book chapter "Tech-ESG Nexus in the Banking Sector: Finance, AI and Digital Transformation," presented at the Annual International Conference on Industry 5.0: Governance, Technology and Sustainability.
